DETAILED ACTION

This continuation application filed is objected to because it introduces new matter into the application. The disclosure presented in the continuation must be the same as that of the original application; i.e., the continuation should not include anything which would constitute new matter if inserted in the original application (MPEP § 201.07 [R-1]). The added material which is not supported by the original disclosure is as follows: the therapeutic condition monitored until **a middle of a therapy**. Also, the **predetermined power supply** in line 16 of claim 17 is not in the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action. Note the new matter is integral to claims 17 and 28.

Claim Objections

Claim 17 is objected to because it is unclear if the predetermined power supply in line 16 is different from the direct current power supply. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 7-14, and 16 of U.S. Patent No.

Art Unit: 3739

6,635,057. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are an obvious change in scope.
